

Allure Report - Installation & Setup

Interactive test execution reporting across frameworks and languages.

Goal of this manual

This manual guides you through the complete installation and configuration process, from preparing the environment to final validation. Follow the steps in order and use each verification checkpoint to confirm that the setup was completed correctly.

Before you start

Confirm the supported operating system, runtime/dependencies and version requirements in the current official documentation before installing. The technical checklist below mirrors the validated tool-specific procedure.

Where to run commands

On Windows use PowerShell or Command Prompt; on macOS/Linux use Terminal. After changing PATH or environment variables, close and reopen the terminal before validating again.

Step-by-step installation and setup

1. Follow this tool-specific step: Consulte allure-framework.github.io/allure3 e escolha o método oficial atual.
2. Follow this tool-specific step: Valide `node --version` e `npm --version` quando usar npm.
3. Follow this tool-specific step: Instale o CLI conforme a documentação oficial.
4. Follow this tool-specific step: Execute `allure --version`.
5. Follow this tool-specific step: Gere resultados de teste compatíveis com Allure usando o adapter do framework.
6. Follow this tool-specific step: Execute o comando oficial para gerar/servir o relatório a partir da pasta de resultados.

Commands and validation

```
node --version
```

```
npm --version
```

```
allure --version
```

First working use

Complete the first working use described in the steps above and confirm the expected tool-specific result before adding integrations or advanced configuration.

Common problems and fixes

allure não reconhecido: confirme método de instalação e PATH/bin do gerenciador usado.

Relatório vazio: confirme que o adapter realmente gerou allure-results.

Não confunda instalação do CLI com instalação do adapter do framework.

Completion criteria

Treat setup as complete when the version/execution checks work and the first use in this manual finishes without errors. Only then move to integrations or advanced configuration.
