

Cypress - Installation & Setup

Interactive Web testing framework for E2E and Component Testing in JavaScript/TypeScript ecosystems.

Goal of this manual

This manual guides you through the complete installation and configuration process, from preparing the environment to final validation. Follow the steps in order and use each verification checkpoint to confirm that the setup was completed correctly.

Before you start

Confirm the supported operating system, runtime/dependencies and version requirements in the current official documentation before installing. The technical checklist below mirrors the validated tool-specific procedure.

Where to run commands

On Windows use PowerShell or Command Prompt; on macOS/Linux use Terminal. After changing PATH or environment variables, close and reopen the terminal before validating again.

Step-by-step installation and setup

1. Follow this tool-specific step: Valide node --version e npm --version.
2. Follow this tool-specific step: Crie cypress-lab, entre nela e execute npm init -y.
3. Follow this tool-specific step: Instale localmente: npm install cypress --save-dev.
4. Follow this tool-specific step: Abra a interface: npx cypress open.
5. Follow this tool-specific step: Escolha E2E Testing, permita a configuração inicial e selecione um browser disponível.
6. Follow this tool-specific step: Crie/execute o spec de exemplo.
7. Follow this tool-specific step: Execute em modo headless: npx cypress run.

Commands and validation

```
node --version
```

```
npm --version
```

```
npm install cypress --save-dev
```

```
npx cypress open
```

```
npx cypress run
```

First working use

Complete the first working use described in the steps above and confirm the expected tool-specific result before adding integrations or advanced configuration.

Common problems and fixes

npx cypress não encontra pacote: confirme node_modules e package.json.

Cypress não abre: valide versão do SO/Node e dependências oficiais.

Browser não disponível: instale/use um browser suportado e confira a lista oficial.

Completion criteria

Treat setup as complete when the version/execution checks work and the first use in this manual finishes without errors. Only then move to integrations or advanced configuration.
