

Locust - Installation & Setup

Locust: concept, Quality Engineering use, first steps and official reference.

Goal of this manual

This manual guides you through the complete installation and configuration process, from preparing the environment to final validation. Follow the steps in order and use each verification checkpoint to confirm that the setup was completed correctly.

Before you start

Confirm the supported operating system, runtime/dependencies and version requirements in the current official documentation before installing. The technical checklist below mirrors the validated tool-specific procedure.

Where to run commands

On Windows use PowerShell or Command Prompt; on macOS/Linux use Terminal. After changing PATH or environment variables, close and reopen the terminal before validating again.

Step-by-step installation and setup

1. Follow this tool-specific step: Crie locust-lab e entre nela.
2. Follow this tool-specific step: Crie .venv e ative.
3. Follow this tool-specific step: Execute `python -m pip install locust`.
4. Follow this tool-specific step: Valide `locust --version`.
5. Follow this tool-specific step: Crie `locustfile.py` com uma `HttpUser` e task simples para uma URL de teste.
6. Follow this tool-specific step: Execute `locust`.
7. Follow this tool-specific step: Abra `http://localhost:8089` e inicie uma carga pequena em ambiente autorizado.

Commands and validation

```
python -m pip install locust
```

```
locust --version
```

```
locust
```

First working use

Complete the first working use described in the steps above and confirm the expected tool-specific result before adding integrations or advanced configuration.

Common problems and fixes

locust não reconhecido: confirme .venv ativo.

Porta 8089 ocupada: encerre o processo ou use opção de porta.

Falhas HTTP no teste: valide alvo/rede antes de culpar a instalação.

Completion criteria

Treat setup as complete when the version/execution checks work and the first use in this manual finishes without errors. Only then move to integrations or advanced configuration.
