

npm - Installation & Setup

Package management and scripts in the JavaScript/TypeScript ecosystem.

Goal of this manual

This manual guides you through the complete installation and configuration process, from preparing the environment to final validation. Follow the steps in order and use each verification checkpoint to confirm that the setup was completed correctly.

Before you start

Confirm the supported operating system, runtime/dependencies and version requirements in the current official documentation before installing. The technical checklist below mirrors the validated tool-specific procedure.

Where to run commands

On Windows use PowerShell or Command Prompt; on macOS/Linux use Terminal. After changing PATH or environment variables, close and reopen the terminal before validating again.

Step-by-step installation and setup

1. Follow this tool-specific step: Instale Node.js pela fonte oficial.
2. Follow this tool-specific step: Abra novo terminal e execute `node --version`.
3. Follow this tool-specific step: Execute `npm --version`.
4. Follow this tool-specific step: Crie npm-lab e entre nela.
5. Follow this tool-specific step: Execute `npm init -y` para criar `package.json`.
6. Follow this tool-specific step: Instale um pacote de teste somente no projeto, por exemplo `npm install --save-dev eslint`.
7. Follow this tool-specific step: Execute `npm list --depth=0` para confirmar as dependências locais.

Commands and validation

```
node --version
```

```
npm --version
```

```
npm init -y
```

```
npm install --save-dev eslint
```

```
npm list --depth=0
```

First working use

Complete the first working use described in the steps above and confirm the expected tool-specific result before adding integrations or advanced configuration.

Common problems and fixes

npm não reconhecido: corrija Node.js/PATH; npm não deve exigir uma instalação separada na maioria dos cenários.

ERESOLVE/dependências: leia a árvore de conflito antes de usar flags que ignoram validações.

Permissões/cache: prefira corrigir instalação/configuração do usuário em vez de executar tudo como Administrador.

Completion criteria

Treat setup as complete when the version/execution checks work and the first use in this manual finishes without errors. Only then move to integrations or advanced configuration.
