

Selenium - Installation & Setup

Mature WebDriver ecosystem for browser automation with Java, Python, C#, JavaScript and other languages.

Goal of this manual

This manual guides you through the complete installation and configuration process, from preparing the environment to final validation. Follow the steps in order and use each verification checkpoint to confirm that the setup was completed correctly.

Before you start

Confirm the supported operating system, runtime/dependencies and version requirements in the current official documentation before installing. The technical checklist below mirrors the validated tool-specific procedure.

Where to run commands

On Windows use PowerShell or Command Prompt; on macOS/Linux use Terminal. After changing PATH or environment variables, close and reopen the terminal before validating again.

Step-by-step installation and setup

1. Follow this tool-specific step: Prepare Python ou Java conforme a linguagem escolhida.
2. Follow this tool-specific step: Python: crie/atue .venv e execute `python -m pip install selenium`.
3. Follow this tool-specific step: Java: adicione Selenium ao Maven/Gradle conforme documentação oficial.
4. Follow this tool-specific step: Não baixe ChromeDriver manualmente por padrão; deixe Selenium Manager resolver driver/browser quando possível.
5. Follow this tool-specific step: Crie um teste mínimo que abra o browser e navegue para `https://example.com`.
6. Follow this tool-specific step: Execute e confirme que o browser abre e a página carrega.

Commands and validation

```
python -m pip install selenium
```

```
python --version
```

First working use

Complete the first working use described in the steps above and confirm the expected tool-specific result before adding integrations or advanced configuration.

Common problems and fixes

Driver/browser não resolvido: verifique rede/proxy/cache do Selenium Manager e compatibilidade do browser.

Ambiente corporativo offline: use a configuração oficial de cache/proxy ou gerenciamento explícito de driver.

Browser abre e fecha imediatamente: confira exceções do script e waits; não é necessariamente problema de instalação.

Completion criteria

Treat setup as complete when the version/execution checks work and the first use in this manual finishes without errors. Only then move to integrations or advanced configuration.
