

QA LAB BRASIL

Reference guide - QA Lab Brasil

QA Setup Center

Installation and configuration guides for a QA workstation.

Choose your track

Playwright + Python, Selenium + Java, API Testing and Mobile have different prerequisites; each track shows a recommended order.

Download and installation

Each tool links to its official site and explains installation, PATH, version validation and common issues.

Environment Doctor

Checklist to verify Python, Java, Node.js, Git, VS Code, Playwright, browsers and other dependencies before running tests.

QA Tip: Always validate an installation with a version command before moving on.
