

Maestro

Declarative mobile automation based on YAML flows.

What is it?

Maestro is a technology/platform relevant to Quality Engineering and test automation.

When to use

Use it when the product and team context justify this type of automation or infrastructure.

Installation and setup

Consulte a documentação oficial para instalar a CLI e validar o ambiente antes do primeiro flow.

First use

Validate prerequisites, credentials/devices and run a small scenario before scaling.

Best practices

Keep configuration versioned and troubleshooting documented.

When to use it

Use this knowledge when product risk, architecture or the delivery stage requires this type of validation. Confirm the goal, environment, required data and expected evidence before starting.

QA tip

■ QA Tip: start with a small flow in Maestro before scaling coverage.
