

Accessibility Insights

Microsoft tool for fast assessments and guided accessibility workflows in Web applications.

What is it?

Microsoft tool for fast assessments and guided accessibility workflows in Web applications.

QA application

Use Accessibility Insights to support investigation, technical validation and evidence collection during testing.

Getting started

Start from the official website, check prerequisites and follow the Accessibility Insights installation/configuration guide.

Practical workflow

Define the analysis goal, reproduce the scenario, collect evidence with Accessibility Insights, compare expected behavior and document conclusions.

Good practices

Use safe test data, preserve relevant evidence and document environment, version, time and reproduction steps.

Troubleshooting

Check permissions, dependencies, certificates, drivers, connectivity and versions when expected data is not captured or displayed.

QA Tip

Combine automation with manual validation and interpret findings in the context of risk and the real user experience.
